Creating Connectors

T-Type enclosure with individual part number

ILME offers a new, additional service: individually lasered enclosures, as individually as your applications - quickly and low cost, following your specifications, for example:

- your **part number**, for a correct assignment of all components
- your **individual marking** for the connector to differentiate between upper and lower part and reduce faults
- your **company logo**
- your **customers** can order items with your article number

Please contact us -
we will gladly show you the best solution for your requirements!
