

CLASS series enclosures sees the introduction of new versions for Heavy Duty aggressive environments distinguishable by the colour RAL 9005 black.

The Heavy Duty series is specially **designed for industrial applications where particularly aggressive external agents are present** (e.g. salty environments, etc.).

The range includes enclosures in the 8 basic sizes and in dual versions with 32 and 48 poles.

The enclosures may be bulkhead, surface-mounting or hoods with side or top entry.

The new version is **distinguished by the black colour** and has the following characteristics:

- new **chromate die-casting** treatment (RoHS compliant) providing **50% improvement in resistance in salt spray tests** (according to UNI EN ISO 9227) compared to the previous green versions
- **oven painted with epoxy polyester powder** (**improved resistance** to chemical agents compared to epoxy polyester).

Other construction characteristics are:

1) CKA..W and MKA..W series

- 21.21 size inserts
- gaskets in anti-aging fluoro elastomer
- monoblock locking device in stainless steel

2) CH..W, CA..W and MH..W, MA..W series

- 44.27, 57.27, 77.27, 104.27, 77.62, 104.62, 66.40 size inserts
- gaskets in anti-aging fluoro elastomer
- pegs in stainless steel
- CLASS type levers (stainless steel lever body, springs and pins, lever in thermoplastic material reinforced with glass fibers)
- supplementary insulation inside enclosures

3) CZ..W and MZ..W series

- 49.16, 66.16 size inserts
- locking device with levers, springs and pins in stainless steel
- pegs in stainless steel
- supplementary insulation inside enclosures

UL approved for USA and Canada for protection ratings **UL Type 4 (= NEMA 4), UL Type 4X (= NEMA 4X) and UL Type 12 (= NEMA 12)** according to the American standard ANSI/UL 50.

With connector complete and with appropriate cable glands, it is possible to guarantee **IP44, IP66 protection** compliant with EN 60529 and **IP69K** compliant with DIN 40050-9 (water jet at 80 °C (± 5 °C) at a pressure of 80bar + 100 bar, for a period of 30s for each angle of inclination 0°, 30°, 60° and 90° w.r.t the plane).

Ambient temperature limits from -40 °C to +125 °C.

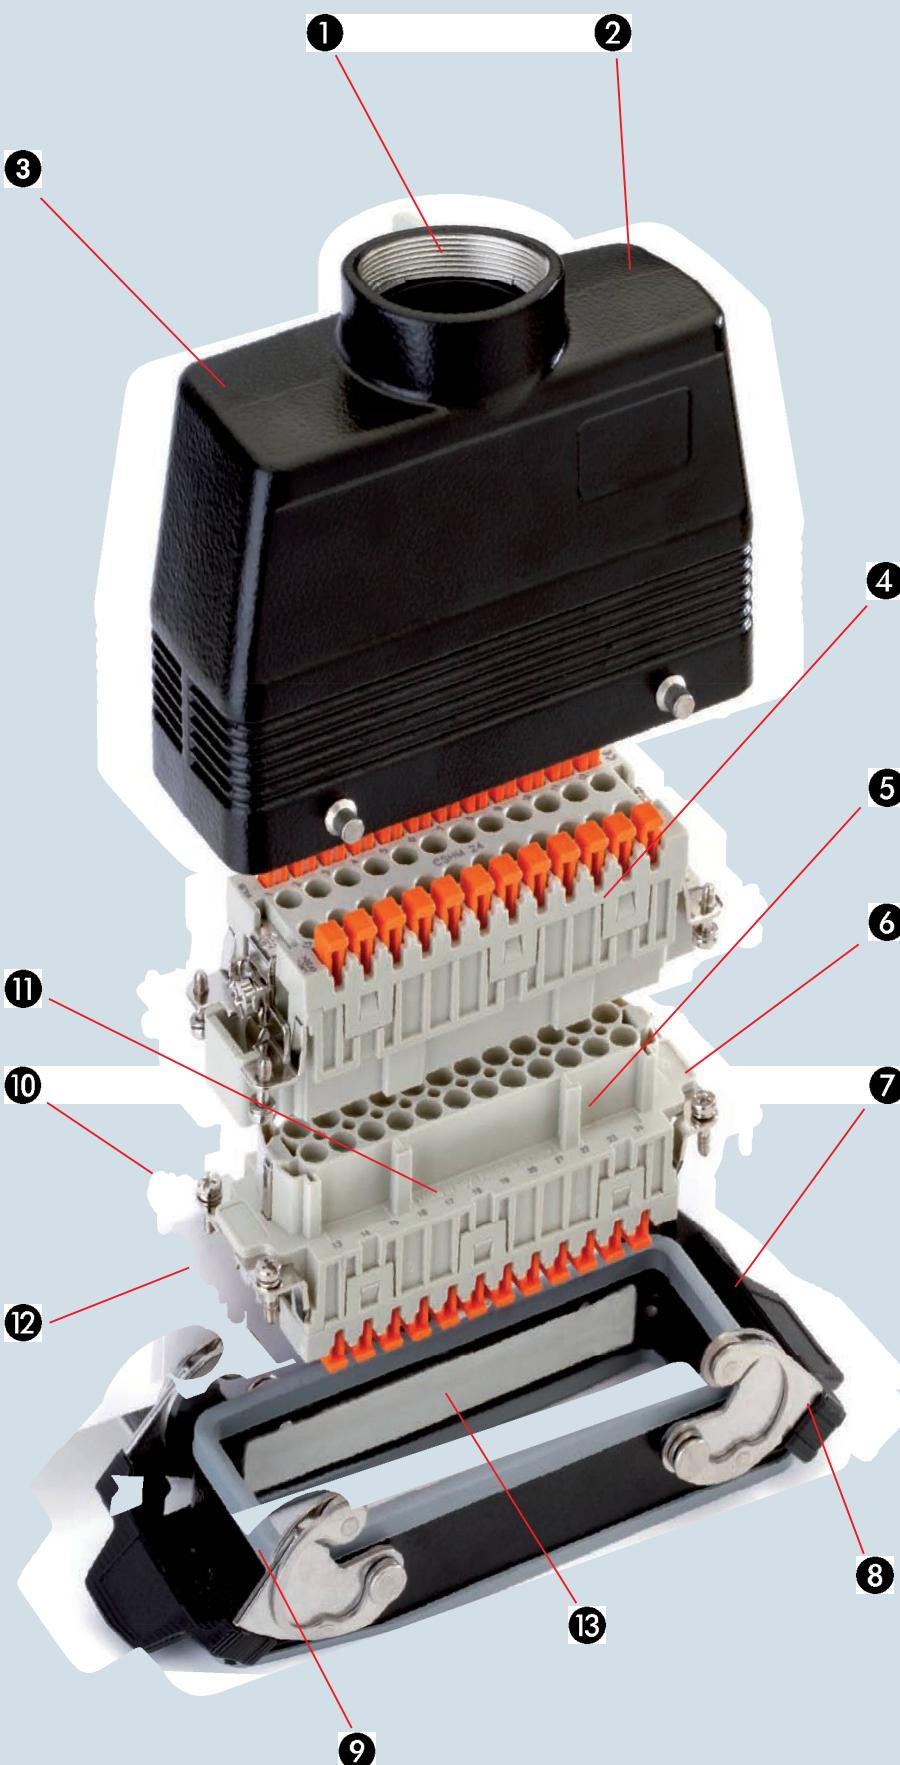

Enclosures **can accommodate all connector inserts** with crimp, screw, spring and the innovative Squich ® connection.

The enclosures do not have any internal tabs and therefore **allow insertion of CME inserts** with rated voltage of 830V, thanks to the additional insulation strips placed inside.

The new series joins the family of traditional CLASS series enclosures and will support the various solutions: **standard (grey), for temperatures up to 180 °C (red), with protection rating IP68, in thermoplastic insulating material (T-Type) and with vertical lever locking system (V-Type).**

The new enclosures for aggressive environments in RAL 9005 black replace the previous and similar green versions.

- ① Threaded cable passage in various Pg diameters (types with pre-code "C") or metric passage (types with pre-code "M") in accordance with EN 60423, for cable entry devices in accordance with EN 50262 (NPT threading on request), may be located vertically, horizontally or frontally.
- ② Sturdy foundry grade aluminium alloy enclosures with stainless steel treated pegs.
Fixed surface-mounted, bulkhead and hood versions are available.
- ③ Metallic enclosures with a coated finish of epoxy-polyester with high resistance to mechanical stress and external agents.
New chromate die-casting treatment (RoHS compliant) providing 50% improvement in resistance in salt spray tests (according to UNI EN ISO 9227) compared to the previous green versions.
- ④ The inserts are made of UL certified self-extinguishing fibreglass reinforced thermoplastics, and feature an operating temperature range between -40 °C and +125 °C.
- ⑤ Insert profile polarised with asymmetrical guides to avoid incorrect matings.
The inserts have a mechanical life equal to or higher than 500 mating cycles.
- ⑥ Inserts are manufactured in compliance with European standard EN 61984 (DIN VDE 0627), certified and identified with UL, CSA, CCC, GL and GOST markings.
- ⑦ Gaskets in anti-aging, oil-resistant and fuel-resistant fluoro elastomer.
- ⑧ Stainless steel closure levers and springs guarantee a perfect closure and sealing.
- ⑨ Locking device available in two versions, simple (with one lever), or double (with two levers).
- ⑩ Captive insert fastening screws, with anti-slackening spring washer
- ⑪ Contact position identified with numbers or codes on both sides of each insert and printed with a laser system or from a die.
- ⑫ Protective earth terminal with a wide contact surface.
- ⑬ Supplementary insulation inside enclosures

1) To obtain the protection rating IP66/IP67 a kit is provided that includes a gasket to fit under the insert fixing screws supplied with the kit (see illustrative example)

Note:

CQ 12 inserts are already supplied with a gasket and screw which ensure IP66/IP67 protection rating.
